

COMPRESSED AIR ALLIANCE

YOUR EXPERTS IN COMPRESSED AIR

Independent | Reliable | Experienced | Professional

Compressed Air Alliance are experts in compressed air systems used in manufacturing and industry.

Compressed Air Alliance is an Australian company that provides a range of compressed air products, services and training throughout Asia/Pacific and across the globe. We were founded on the principles of independence, professionalism, integrity and transparency.

We work with the compressed air system holistically, from the compressor to the end use equipment. Our focus is on reducing the total

cost of ownership, energy consumption and system demand by improving the efficiency, reliability of compressed air systems.

We provide independent, unbiased advice on system design, equipment selection, installation, set up, operation and maintenance. We can work with your current service provider to optimise your existing installation ensuring you get optimal performance at all times.

What we do

Products

We offer a range of high quality, reliable monitoring and measurement products. Our sensors can be used for compressed air and inert gases in temporary or permanent applications.

- Condensate Drains
- Data Analysis Software
- Dew Point Sensors
- Flow Meters
- Power Meters
- Pressure Sensors
- Temperature Sensors

Services

Compressed Air Alliance provides a range of services to our Asia/Pacific and Global customers.

- Air Purity Testing
- Leak Detection & Repairs
- Monitoring and Measurement
- Equipment Selection
- System Optimisation
- Project Management
- Grant and Funding applications

Training

Our training courses are targeted to anyone who works with compressed air systems. Learn how to get the best out of your system, how to identify and solve problems and how to avoid common pitfalls.

- Advanced Air Techniques
- Specialist courses
- Auditing

“Compressed Air Alliance have delivered over \$120k in savings from leak repairs since we embarked on our continuous improvement journey back in 2020. Combined with specific and valuable advice, Warwick and his team have delivered results with professionalism and honesty.

Jarrold, Engineering Manager, CSR

What our customers are saying

Compressed Air Alliance saved us over \$100,000 per year. By reducing our compressed air requirements and letting them select, install and maintain our new compressors we have reduced the energy use of the system by more than 70%. They helped us secure grants for the project and their independent advice was invaluable.

**Davis, Extrusion Business
Manager, Capral Aluminium**

Compressed Air Alliance have been great to work with. By providing not only leakage audit services, but practical, hands on rectification of the issues identified in the audits we have been able to capitalise on the energy and cost saving opportunities identified during the leakage audits. In addition to leakage rectification, compressed air alliance have provided technical expertise in compressed air system operation to assist with the optimisation of our system.

James, Maintenance Manager, Bega
