About

With this 'all-in-one' wall mounted unit you can continuously monitor your dryer performance and system pressure (if fitted with the optional pressure sensor). Should an issue occur, the integrated alarm light will draw immediate attention.

The dew point sensor is resistant to condensation, particulate contamination, oil vapors and most chemicals.

The fast response time ensures an accurate and up to date reading, giving you peace of mind that your system is under control. Sensor calibration can be performed every 2 years.

Applications

- Manufacturing and industrial use
- Gas Types: compressed air, nitrogen and inert gas systems
- Temporary or permanent installation
- Dryer types: refrigerant, drum, hybrid, desiccant, or membrane dryers
- Gas pressure up to 17 bar (246 psi)
