

# **Pressure Transmitter**

Pressure measurement in compressed air and gas systems

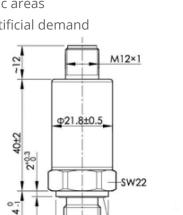

#### **Features**

- Two pressure ranges available to suit most applications
- Easy to install and wire
- **Stainless Steel Casing**
- 4 20mA loop powered output
- 24vDC powered
- IP67 rated
- Operating range between -30°C to +80°C
- M12 Connector with 5m Cable option

## Wiring:

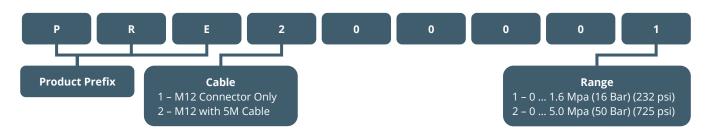

G1/4 A

±18.8±0.1

DIN 3869-14-FKM

### How to Order:

For OEM or Private Label version, please contact Compressed Air Alliance

sales@compressedairalliance.com www.compressedairalliance.com

#### **Benefits of monitoring pressure:**

- Accurately read pressure in various parts of the plant back to one location •
- Combine multiple sensors to calculate pressure drops •
- Identify supply or demand issues at specific points •
- Trend changes in equipment performance •
- Reduce waste by targeting specific areas •
- Improve efficiency and reduce artificial demand •
